WORKING PAPER

Project: 8929  
Date: 891006  
Time: 1318-1418  
Viewer: 018  
Session: 01

SUMMARY OF INFORMATION:

1. (S/NF/SK) Describe the target (and provide sketches):
  - a. The general site area was in darkness at the time of the session (daylight here). It is an area of fairly high altitude, with a barren, rocky, somewhat mountainous appearance.
  - b. In spite of the barren, isolated aspect of the general area, there are several structures involved in the immediate site area. I could not distinguish how many buildings were involved, but the number did not look small.
  - c. The actual target is a structure located amid the others. It has both an above-ground and a below-ground component (See Fig. 1). The above-ground area was well lit from the inside, with many windows. However, I did not detect much activity in the upper portion, at the time of the session. There was activity in the lower, underground portion of the structure, and I was drawn to that location.
2. (S/NF/SK) Just as I was moving to investigate the lower portion of the structure, there was a power failure (in the session area, not at the target site), and completion of the session had to be postponed until later.
